ROM (two copies to replace the paper sequence listing and 1 copy to serve as the CRF copy). Applicant has amended the sequences to comply with sequence listing rules and has added a descriptor at paragraph <222> for each sequence that uses an "n" in place of a particular nucleotide, thereby providing the range of nucleotides where the "n" is utilized. The feature description at <223> was already in the sequence listing as filed and so no new matter has been added.
